

**GENERAL DESCRIPTION**

The N2576 Series switching voltage regulators (SVR) are monolithic integrated circuits that provide all the active functions for a step-down (buck) switching regulator. Both series are capable of driving 3 A load respectively with excellent line and load regulation.

The N2576 Series SVR include a switching regulator and compensation network all within the same package. Just add a choke, catch diode and two capacitors to obtain an efficient DC-to-DC converter. The output switch includes cycle-by-cycle current limiting, as well as thermal shutdown for full protection under fault conditions.

The N2576 Series SVR offer replacement for popular 3 terminal linear regulators by providing higher efficiency with reduced heat sink size. In many applications a heat sink will not be required.

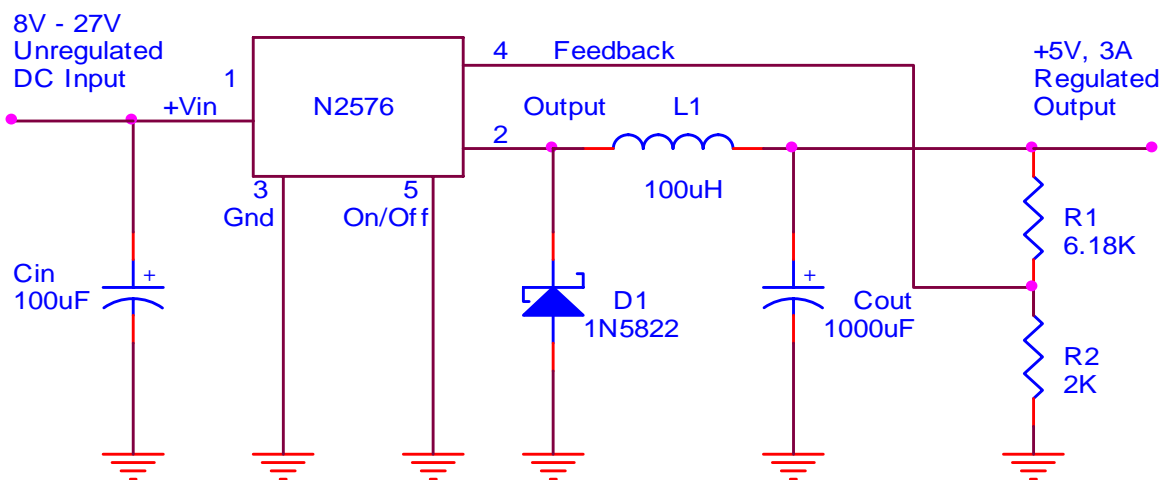

**FEATURES**

- Pin compatible with industry products of LM2576 Series
- Adjustable output versions
- Wide output voltage range, 1.23V to 27V for adjustable output version
- DC-to-DC buck converter requiring only 4 external parts
- 52 KHz fixed frequency internal oscillator
- TTL shutdown capability, low power stand-by mode
- High efficiency
- Uses readily available standard inductors

**APPLICATIONS**

- Simple high-efficiency step-down (buck) regulator
- Positive to negative converter (Inverting Buck-Boost)
- Isolated Fly back Converter using minimum number of external parts
- Powering portable instrument, Set-Top Box, LCD Monitor, Scanner, I.A, Easy PC
- SMPS Post-Regulator

**TYPICAL APPLICATION**

\*  $V_{OUT} = 1.23V ( 1 + R1 / R2 )$

**Adjustable Regulator in Fixed Output Application**

**ABSOLUTE MAXIMUM RATINGS**

- Maximum Supply Voltage 30V
- ON/OFF Pin Input Voltage  $-0.3 \leq V \leq +V_I$
- Output Voltage to Ground (Stead State) -1V
- Power Dissipation Internally Limited
- Thermal Resistance Junction to Case,  $\theta_{JC}$  2.0°C/W
- Thermal Resistance Junction to Ambient,  $\theta_{JA}$  TO-220 50°C/W  
TO-263 60°C/W
- Operating Junction Temperature Range -40 to 125°C
- Storage Temperature Range -65 to 150°C
- Lead Temperature (Soldering, 10 Seconds) 260°C
