

## 1 dB LSB GaAs IC 5 - BIT DIGITAL ATTENUATOR 0.7 - 3.7 GHz

FEBRUARY 2001

v02.1100

### Features

- 1 dB LSB STEPS to 31 dB
- SINGLE POSITIVE CONTROL PER BIT
- +/- 0.5 dB TYPICAL BIT ERROR
- MINIATURE MSOP 10 PACKAGE: 14.8 mm<sup>2</sup>

### General Description

The HMC273MS10G is a broadband 5 - bit positive control GaAs IC digital attenuator in a 10 lead MSOP plastic package. Covering 0.7 to 3.7 GHz the insertion loss is typically less than 2 dB. The attenuator bit values are 1 (LSB), 2, 4, 8, and 16 dB for a total attenuation of 31 dB. Accuracy is excellent at  $\pm 0.5$  dB typical with an IIP3 of up to +48 dBm. Five bit control voltage inputs, toggled between 0 and +3 to +5 volts, are used to select each attenuation state. A single Vdd bias of +3 to +5 volts applied through an external 5K $\Omega$  resistor is required. The HMC273MS10G is ideal for cellular, PCS, ISM, MMDS, and WLL applications and is an excellent alternative to the HMC235QS16G. At 14.8 mm<sup>2</sup>, this is the smallest 5 - bit digital attenuator available in the market.

### Guaranteed Performance

With Vdd = +3V to +5V & Vctl = 0/Vdd (Unless Otherwise Stated), -40 to +85 deg C

### Functional Diagram/ Application Circuit

DC blocking capacitors C1 & C2 are required on RF1 & RF2. Choose C1 = C2 = 100 ~ 300 pF to allow lowest customer specific frequency to pass with minimal loss. R1 = 5KΩ is required to supply voltage to the circuit through either PIN 6 or PIN 10.

### Evaluation Circuit Board

\* R2 - R6 = 100 Ω .  
 These resistors are optional and may be used to enhance decoupling of the RF path from the control inputs.

The circuit board used in the final application should use RF circuit design techniques. Signal lines should have 50 ohm impedance while the package ground leads and exposed paddle should be connected directly to the ground plane similar to that shown above. A sufficient number of VIA holes should be used to connect the top and bottom ground planes. The evaluation circuit board as shown is available from Hittite upon request.
